- measurement
 - graphing
- systems/parts of a system

Science News

We are learning about
oviparous animals.
Oviparous animals are
animals that lay eggs. In
our Timberline science lab,
we have an incubator with
eggs. We are predicting
which animals will hatch
from our eggs. We will be
observing and recording
about them in our Science
Journals. We will let you
know when we discover
what hatches from them!

You are invited to come and help
with our class Valentine party on
Thursday, February 14th from
12:30-1:30. Volunteers are always
appreciated! The kindergarteners
are being served ice cream
sundaes! We would love to see
you. 😊
